

Packaging

Packaging should be an integrated support industry within the Shahapur Fiber-to-Fashion Industrial Park. It connects manufacturing directly to warehousing, logistics, retail and exports.

Packaging Product Range

The park can support manufacturers of:

- Garment boxes
- Corrugated cartons
- Textile bags
- Polybags and protective packaging
- Paper bags
- Reusable fabric bags
- Labels and tags
- Hangers
- Garment covers
- Shrink packaging
- Export packaging
- Pallets and protective materials

Integrated Packaging Flow

Domestic + Export Market

Sustainable Packaging

A strong opportunity is to create a Green Packaging Cluster using:

- Recycled paper
- Recycled cardboard

- Reusable textile bags
- Recyclable packaging
- Reduced-plastic packaging
- Water-based printing
- Sustainable labels and tags

This supports the project's Green Utility objective.

Packaging Cluster

A centralized packaging zone could include:

Corrugated Box Unit

→ Cartons for garment and textile shipments

Printing & Label Unit

→ Labels, tags, cartons and branding

Garment Packaging Unit

→ Folding, polybagging and retail-ready packing

Export Packaging Unit

→ Buyer-specific export packaging

Reusable Packaging Unit

→ Fabric bags and reusable transport packaging
